Education

National University of Singapore, Bachelor of Computing (Computer Science), Aug 2023 - Apr 2027. GPA: 4.69 / 5.00. Specialized Track: Artificial Intelligence.

Technical Skills

Languages: Python, TypeScript, JavaScript, Java, SQL, C/C++, HTML/CSS, Go, LaTeX

Frameworks: React, Next.js, Node.js, tRPC, JavaFX, LangChain, LangGraph, Playwright

Tools: Git, PostgreSQL, pgvector, Docker, Vercel, VS Code, Firebase

Experience

Software Engineering Intern, Visa

- Visa, Singapore (May 2026 - Present)

- Currently interning as a software engineering intern at Visa.
- Building production-minded software in the payments space while applying full-stack engineering, testing, and delivery practices from prior AI, RAG, and platform projects.

Lead Developer, Project Aegis

- National Cybersecurity Olympiad, Singapore (Jan 2026 - Mar 2026)

- Led full-stack development of a controlled AI-access platform for 80 CTF participants, enabling LLM use under organiser-enforced rate limits and usage policies.
- Built guardrails, LLM middleware, and a RAG system to ground responses in cybersecurity knowledge while reducing AI-assisted cheating risk.
- Introduced a token budget that forced participants to prompt carefully and preserve skill expression during the event.
- Helped ship the platform over 2 months with 316 PRs across the team.

Machine Learning Intern, IMDA

- Infocomm Media Development Authority, Singapore (May 2025 - Aug 2025)

- Designed and implemented a modular ML pipeline for data parsing, feature engineering, model training, and explainability.
- Evaluated anomaly detection models for malicious SSL/TLS certificate classification, achieving a 0.994 F1-score.
- Used Explainable AI (LIME) and feature importance analysis to improve model transparency and stakeholder confidence.

Strategic Digital Projects Intern, IMDA

- Infocomm Media Development Authority, Singapore (May 2024 - Aug 2024)

- Collaborated with Microsoft and AWS to organize GenAI workshops, leading to 30+ companies initiating GenAI projects.
- Led a Salesforce-based data consolidation initiative, streamlining cluster management and cutting data retrieval time by 35%.

Projects

Freak-Cha

- Frontend & Computer Vision Developer, HackHarvard 2025. CAPTCHA-inspired facial-expression challenge; awarded Funniest Hack.

VBook

- Team Lead, NUS. JavaFX-based CLI contact manager optimized for developers.

MicDrop

- Team Lead, Hack & Roll. Karaoke app using React Native, Node.js, Supabase, and Spotify API.
